Bar code developers | 01/06/2022-15/08/2022

web development one month and 45 days training

COURSES

Computer Basic Course | 88% | 2018 Dashmesh computers, Ghanaur
Programming Languages Course | 90% | 2019 C, C++, HTML, CSS
programming languages course from Dashmesh Computers,

EXPERIENCE

Product Support & QA Intern

- **BlueBrick Technologies – Remote | Jan 2025 – Apr 2025**
World's most elite cybersecurity and innovation powerhouse
Provided Level 1 support for core product Axiom Protect, managing real-time client issues, analyzing system behavior, and escalating critical tickets. Conducted hands-on QA testing across BlueBrick's suite, including Collabrix, Veri5Now, and EngageBot to ensure seamless product performance pre-release.
- **QA Engineer (Automation/Manual) | NetzoOptimize May 2025 – Present**
Currently working as a QA Engineer with hands-on experience in automation and manual testing.
 - Automation Testing: Selenium (Java), Playwright
 - Programming Languages: Java,
 - JavaScript Automation Tools:
 - Playwright, Selenium Basics of
 - Cypress Functional Testing Test
 - Case Design & Execution Bug
 - Reporting & Tracking

Projects

- **Veri5 Digital Identity Verification System**
 - Technology Used: Web-based platform | Manual Testing | API Testing | Jira | Postman
 - Project Description:
Veri5 is a real-time digital identity verification platform that provides seamless eKYC, face match, Aadhaar authentication, document verification, and onboarding solutions for enterprises. Responsibilities:
■ Performed manual testing on modules like eKYC, OTP authentication, and face verification workflows.
 - Validated API responses using Postman for Aadhaar number, PAN, and mobile verification.
 - Identified and reported UI/UX issues and inconsistencies across browsers.
 - Assisted product support team in reproducing bugs reported by clients and documenting resolution steps.
 - Wrote test cases for user onboarding flow including document upload, verification, and approval processes.
 - Verified Aadhaar Masking and Consent Capture functionality for compliance.
 - Worked on regression testing after feature updates and hotfixes.
- **Collabrix – B2B Communication & Document Collaboration Platform**
 - Tools & Tech: Web App | Manual Testing | Jira | Postman | Bug Reporting | (Basic)
 - Project Description:
Collabrix is a digital platform for managing B2B partnerships and vendor collaborations. It provides features like document sharing, workflow automation, e-signatures, and secure partner onboarding.
 - Responsibilities:
■ Conducted manual testing of modules including Partner Onboarding, Workflow Automation, and Document Upload.
 - Wrote and executed test cases for key features like e-signing, document preview, and user role management.
 - Performed UI/UX testing across desktop and mobile browsers to ensure consistency.
 - Reported bugs using Jira, categorized them by priority, and followed up on resolutions with the dev team.
 - Simulated user support issues (e.g., document not opening, workflow not triggering) and documented solutions.
 - Validated user permissions and access restrictions to ensure compliance and security.
 - Participated in regression testing after deployment to ensure key workflows remained functional.
